Dear Valued Partner,

Imagine a packaging experience that not only captures the essence of your brand but also carries the promise of a sustainable future. This is what awaits you within these pages.

In a bustling marketplace, standing out is not just an option—it's a necessity. Your products deserve a showcase that speaks volumes on the shelf and whispers a tale of responsibility and care. That's where the golden touch of customized solutions becomes your brand's best ally.

Let's talk about your journey, your brand's signature, your story. It's time to elevate your narrative with packaging that pairs perfectly with the caliber of products you offer. It's about crafting an experience from the first glance to the final touch, ensuring every interaction with your product is memorable.

Consider this: a packaging solution that aligns with your vision, that flexes with your market's demands, and that evolves as swiftly as your needs. A partnership where your product's integrity and consumer appeal are the cornerstones of every design.

You have a vision for a product line that's both revolutionary and reflective of your commitment to excellence. It's now time to bring that vision into reality with a partner who understands the importance of every detail.

As you peruse our offerings, remember this is more than a catalog—it's a canvas where your ideas can take shape, bolstered by the expertise and innovation that have become synonymous with a name that stands for quality and sustainability.

The best of your brand is yet to unfold. Let's make it remarkable.

Warmly,

Aditya Maheshwari
CEO, Kanak Naturals

Kore Mission:

Kost-Effective Sustainability

At the heart of **Kanak Naturals** lies a commitment that extends beyond the fiscal quarter—it's a vision spanning a quarter of a century, advocating for sustainable practices that benefit our shared environment. As a family-owned enterprise, we take pride in our financial independence, which steers our dedication to eco-consciousness.

4

The collective environmental goals set by nations and companies worldwide suggest a need for vast expanses of greenery, far beyond the landmass available. It's an ambitious target, to say the least.

We recognize that the reduction of consumption through clever, forward-thinking business strategies is a more practical approach than the Sisyphean task of planting an ocean of trees.

Trees are the lungs of our planet, not a resource to be diminished for single-use items. We turn to the robustness of renewable resources like bamboo and sugarcane—powerhouses of sustainability. They don't just endure; they thrive under pressure and are the antithesis to synthetics like plastic and foam.

Our inception was inspired by this very philosophy. By valorizing sugarcane and championing the swift regrowth of bamboo, we harness the vitality of the earth. Our products are born from vegetation, and our advanced manufacturing processes elevate these plant-based materials into eco-friendly masterpieces.

Where innovation meets nature to craft a greener tomorrow.

www.kanaknaturals.com

Kanak's Kreation:

The three major sources of cellulose based fibers used in the world to manufacture paper are hardwood and softwood pulp, cotton fiber along with bamboo and sugarcane fiber (often called bagasse). We use bamboo and bagasse for our dinnerware.

Why? Bamboo is a fast growing renewable resource and can be re-harvested every 4 to 4 ½ years. In comparison hardwood trees have a 30 to 60 year growth cycle. Bamboo grass does not require re-planting unlike hardwood-softwood sugarcane is renewable because it's a crop that is replanted over every year. After the cane juice is extracted from the sugarcane stalk, we upcycle the stalk (bagasse) which otherwise would end up in landfills or burned, to produce beautiful molded dinnerware.

RENEWABLE

After sugarcane juice is extracted from the plant, we upcycle the stalk, which would have otherwise burned or ended up in a landfill, into beautiful molded fiber dinnerware. **Renewable materials like sugarcane and bamboo are some of the strongest fibers out there.** They make great molded fiber products that hold up to just about anything. Best of all, these materials create less waste than paper (wood pulp), and no chlorine is used in manufacturing.

Because they grow so rapidly, they are easily replenished each year and are about as far from plastic and foam as you can get. This is a simple step toward sustainability and **ensuring our products are tree-free.**

MANUFACTURING

We know that sustainability is not just about plants and smarter products, it's about people, jobs and energy. Our communities and facilities are part of our sustainability story. We have a state-of-the-art manufacturing facility that intelligently crafts our fiber products into works of art. Not only that, we audit our manufacturers to the best social compliance standards going. **The people that build our products work in safe, healthy spaces.**

Best of all, we are bringing our molded fiber manufacturing technology to the US, so we can do what we do best, right here at home.

OUR FUTURE

All our products are made well, and made smart. We know that choosing products that are better for the environment should be something that everyone can do. It should be easy, not more expensive.

Sustainability at Kanak Naturals means bringing smarter products to everyone at the right price. **That way, anyone can be the change they want to see in the world.**

WASTE

Because we use only renewable materials, all our products are BPI Certified to be commercially compostable. That means that when you are done using one of our plates or bowls, you can compost it in a commercial compost facility. Even if you can't compost in your area, our products help shift everyone farther away from plastic and foam. **By creating products that have great beginnings, middles, and endings, we're leading the way forward.** That is how we think about sustainability

Trusted By Big Brands Nationwide

Discover why America's leading retail and restaurant chains choose Kanak Naturals.

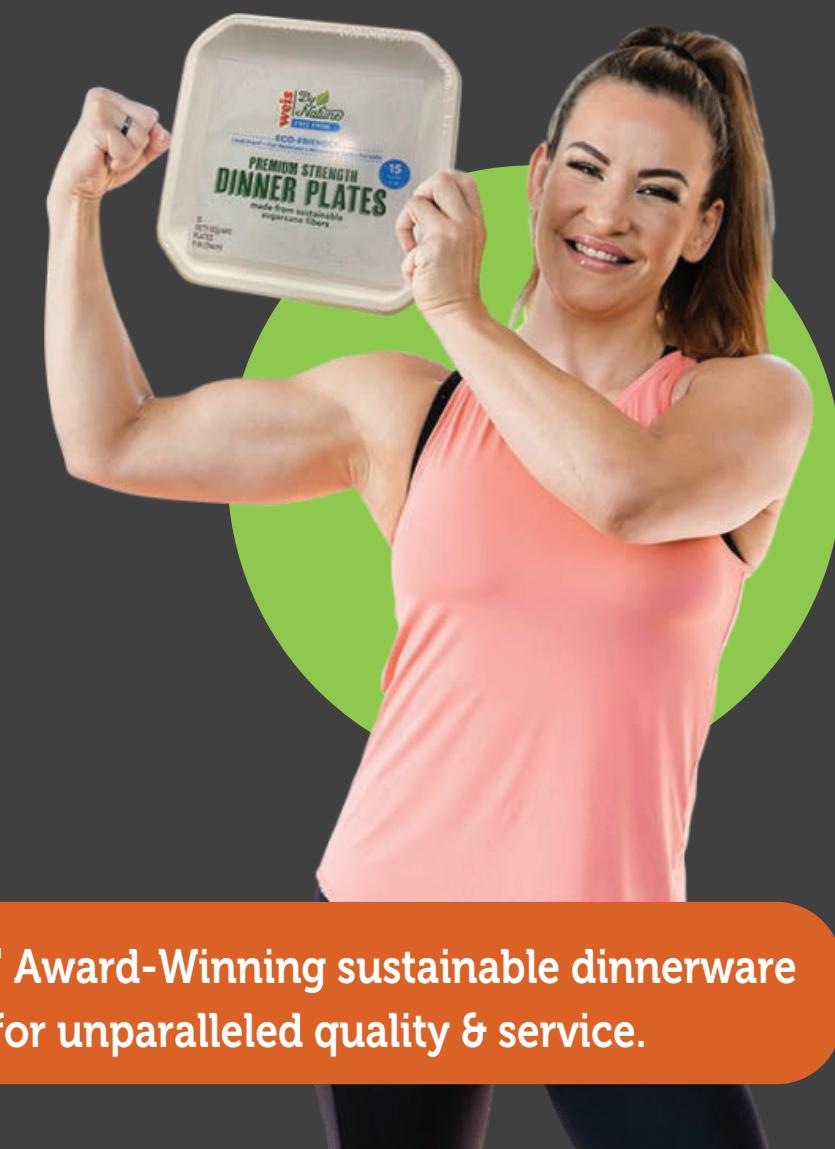

Award-Winning Excellence

PLMA 2022 Best Plate Award

Our Sustainables® 9" Octi-Square Plate has clinched the **PLMA 2022 Best Plate Award** in the Home & Household category, standing out among thousands with its innovative, eco-friendly design.

Quality Confirmed by Experts and Consumers. Judged for innovation, design, and value, our plate received top marks from industry experts and consumer panels, reaffirming our dedication to meeting the needs of eco-conscious customers.

Sustainability and Style in Every Plate. Manufactured in BRC certified facilities, each heavyweight plate embodies our promise of excellence and our commitment to the environment.

Naturals' Award-Winning sustainable dinnerware
for unparalleled quality & service.

DEI Commitment

Kanak Naturals is more than a leader in sustainable packaging; we're pioneers in diversity, equity, and inclusion.

In partnership with global brands like McDonald's, we're advancing DEI initiatives, increasing diverse talent and supplier representation, and nurturing innovation for a more equitable future. Join us as we share our progress and learn together, strengthening communities and our collective impact.

A "Smart" Retailer's Endorsement

Kanak Naturals secured a partnership with a major "smart" retailer by offering consistent quality and reliable, timely deliveries across a multi-million dollar, 9 SKU program.

Our proactive management during supply chain disruptions ensured seamless inventory availability, showcasing our resilience and dependability.

Who We Work With

Retail

Revolutionizing Your Shelves With A **Kustom Private Label** Program.

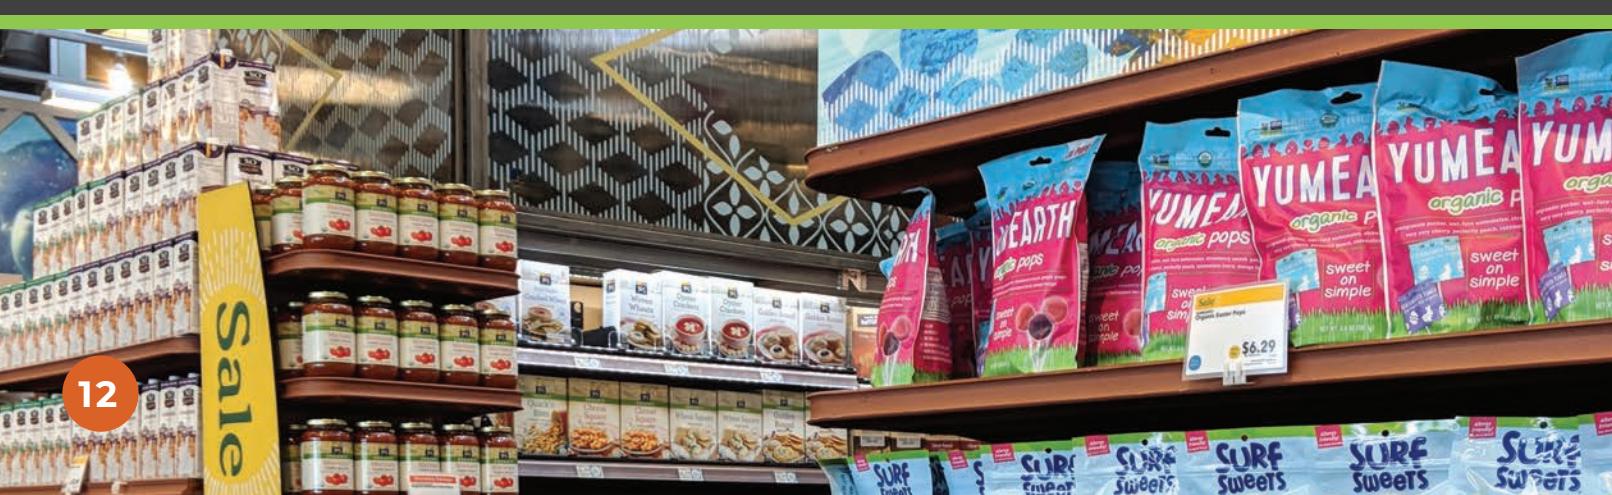

Your retail space should reflect readiness and quality. With KanaK's US manufacturing capabilities, you can stock your shelves with confidence knowing you're always prepared to meet your customers' expectations, no matter how big.

Foodservice

Mess? **What Mess?**

Kanak ensures that your focus is on the cuisine not the cleanup.

- Packaged in USA.
- Polyolefin film printed in the USA.
- Perforated for better nesting.
- High graphic printing.

Your Market Footprint - Circular & Sustainable

Join Kanak Naturals on a path of Konscious innovation – packaging designed for impact and integrity.

Embossing/Printing Excellence

Kanak Naturals ensures that your brand identity is integral to the product experience. Our custom embossing and printing technology allows your logo to resonate with consumers, offered without any additional tooling fees.

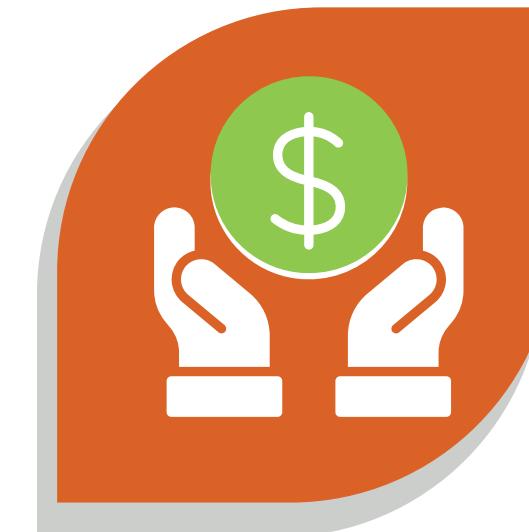

Packaging Prowess

Our Fort Wayne facility stands as a testament to our commitment to domestic quality and strength. We use domestically sourced materials, offering superior packaging solutions that help our partners' products shine on the shelf against international competition.

Flexibility and Security

Our ample inventory and domestic packaging flexibility mean we can rapidly meet changing demands. This adaptability was crucial during the pandemic, ensuring that our partners' shelves remained stocked even in the most unpredictable of times.

Cost-Saving Logistics

Shipping our products in bulk from overseas allows us to keep costs low and quality high, a strategy that has established us as the go-to supplier for major retailers.

Kase Studies: Real Stories Real Impact.

1 A “Smart” Retailer’s Eco Revolution A 135% Surge in Private Label Excellence

What We Did:

One large US grocery retailer aimed to increase their private label presence with a focus on sustainability. Kanak Naturals delivered with adaptive packaging solutions with no added PFAS, driving a private label program that echoed the retailer's commitment to quality and eco-friendly products.

Results:

This strategic partnership resulted in a significant 135% volume increase in just 3.5 years, showcasing the impact of sustainable and consumer-focused product offerings.

2 A Leading Grocer’s Private Label Expansion Nine-Year Evolution with Kanak Naturals

What We Did:

A top national grocery brand needed to enhance its private label line to offer high-quality, eco-friendly products. Over nine years, Kanak Naturals has expanded their offerings from 6 to 14 SKUs, providing embossing and printing services without additional charges, and packing products domestically to offer superior quality.

Results:

The strategic partnership led to a multi-year contract extension, affirming the grocer's trust and establishing Kanak Naturals as a key player in private label retail.

3

When One Of the Largest Fast Food Brands Craved Sustainability, we Super-Sized Their Eco-Efforts!

What We Did:

This large fast food chain with golden arches was looking to elevate their brand while sticking to their sustainability commitments. Kanak Naturals stepped in to provide custom embossed, eco-friendly molded fiber products at no additional cost for tooling, ensuring that the brand's eco-friendly message was clear and tangible.

Results:

We not only reinforced their brand identity with custom embossed products but also enhanced their reputation as an eco-conscious company, aligning with their sustainability objectives seamlessly. We ultimately delivered sustainable packaging with no added PFAS.

4

This Large Barbecue Brand Packs Heat with Vented Clamshells that Boosted Brand Visibility

What We Did:

This well-known BBQ brand needed packaging that would maintain product integrity and enhance brand presence. Kanak Naturals responded with custom vented clamshells that showcased the brand's commitment to quality. They also wanted to sustainable packaging, so we developed products with no added PFAS.

Results:

The innovative packaging solution led to a remarkable 135% increase in volume, driven by improved brand visibility and product functionality.

Burrito Bowls Reimagined for Culinary Trendsetters

What We Did:

A trailblazer in fast-casual dining, famed for its build-your-own meal concept, partnered with us to enhance the customer experience through innovative packaging solutions. We crafted burrito bowls that not only maintained meal quality and heat but also incorporated a complete dining set for on-the-go convenience. Emphasizing brand consistency, we designed the bowls with customizable branding, showcasing the culinary leader's vibrant identity with every meal served.

Results:

Our multifaceted packaging solutions resulted in an enhanced dining experience, elevating the brand's reputation for quality and care. Operational workflows improved, spillage was minimized, and meal presentation was elevated, contributing to the brand's success and customer satisfaction.

A Pioneering Mobile Meal Service's Packaging Transformation: Custom Containers That Convey Compassion

What We Did:

The largest community meal service provider faced the challenge of delivering high-quality, accessible meals. Kanak Naturals developed sealable, insulated, and custom-sized containers to match the program's requirements while maintaining the integrity and temperature of meals.

Results:

The custom packaging solution not only streamlined meal distribution but also enhanced the recipients' dining experience, reflecting Kanak Naturals' commitment to community well-being and service excellence.

We make everything from renewable materials, including our cutlery. This makes it easy to go green or zero waste just compost our cutlery right along with everything else! Made entirely from crystallized PLA, our cutlery won't crack and break in use. It stands up to heat but will break down when composted.

- Made from PLA plant based plastic-no petroleum products
- Stronger and sturdier than traditional products
- Compostable
- Available in black and white

**Our Cutlery is made out of CPLA.
Which is high - heat resistant and compostable.**

Elevate Your Brand with Kanak's Kustom Kreation Packaging

Kanak Naturals transforms your vision into reality through their bespoke customization program. From the moment you reach out to Kanak, they're aligning their expertise with your unique needs. Their designers and engineers become architects of your ideas, drafting the first blueprints of innovation. They select materials that are not just environmentally friendly, but also robust and suited to your product's demands, ensuring that sustainability never compromises quality.

Step 1 Client Consultation and Needs Assessment

Kanak Naturals begins with an in-depth consultation to understand your brand's unique needs. This collaborative discussion helps to identify the specific challenges and requirements of your food service packaging.

Step 2 Design and Material Selection

Based on the initial assessment, Kanak's design team drafts bespoke packaging solutions, selecting materials that align with both functionality and sustainability goals. You'll be presented with options that balance eco-friendliness and practicality.

Step 3 Prototyping and Client Feedback

A prototype is created and shared with you for review. Your feedback is crucial, and Kanak Naturals encourages a transparent dialogue to refine the product to perfection.

Step 4 Rigorous Testing for Quality Assurance

The proposed solution undergoes stringent testing for durability, grease resistance, temperature tolerance, and more. This step ensures that the packaging stands up to real-world use and adheres to Kanak's high standards.

Brand Integration and Kustomization

Your brand identity is incorporated into the packaging through custom printing or other branding techniques, ensuring the final product is a true extension of your brand.

Step 5

Final Approval and Production

Once you are satisfied with the design, functionality, and branding, the packaging solution goes into production. Kanak's attention to detail ensures that every batch adheres to the agreed-upon specifications.

Step 6

Delivery and Implementation

The finished packaging is delivered ready for use. Kanak Naturals provides support during the implementation phase to ensure a seamless transition to the new packaging.

Step 7

Ongoing Support and Optimization

Kanak Naturals stays engaged post-delivery, gathering feedback, and offering ongoing support. They are committed to continuous improvement and will work with you to optimize packaging solutions as your brand evolves.

Step 8

Kontact Our Sales Team To Start Your Kustom Program Today!
